**THE  
BEST IN** CANON LCOS AND LCD PROJECTORS  
**PROJECTOR  
TECHNOLOGY**

IF IT LOOKS THIS GOOD,

IT  
MUST  
BE  
CANON  
OPTICS

## ❖ A Legacy of Optical Breakthrough Technologies

The prowess of a projector relies significantly on the quality of its lens. With some 70 years of imaging experience and expertise, Canon has pioneered and perfected the technologies in making projectors that consistently outperform its rivals. Canon projectors have gained worldwide recognition as highly advanced devices displaying unsurpassed imaging quality at a price point unmatched even by its fiercest competitors.

In the heart of every Canon projector lies the latest innovative display of panels and optical engines that reproduce clearer, brighter and more lifelike images every time. The genuine Canon lenses employed in Canon projectors are finely honed precision instruments engineered to the highest specifications. With such stunning display of high-quality images, Canon projectors are ideal companion for corporate presentation, educational purposes and even cinematic home theatre experience.

## ❖ Powerful Wide-Angle Zoom Lens

Normally, a projector must be positioned far away from the screen to project a large image. Canon understand this is a constant problem for offices with small meeting area. To overcome this physical constraint, Canon features powerful wide-angle zoom lenses in both XEED projectors (with 1.7x zoom lenses) and LV projectors (with 1.6x zoom lenses), allowing user to achieve huge, vibrant images from less than 2 metres. This is very useful for those who require home theatre setup.

## The Cross Section Of A Canon Projector Lens

Helps produce a more vivid image by limiting distortion, astigmatism and spherical aberration. Also reduces the number of lens elements required for clear projection.

## Delivers Bigger Images From Short Distances

# XEED SERIES LCOS PROJECTOR

Canon XEED Projectors  
The Synergy of Two Revolutionary Technologies; LCOS & AISYS

## ❖ LCOS

LCOS, or Liquid Crystal on Silicon, is the latest evolution in projector technology that allows pixels to be placed next to each successive pixel with an ultra-fine pitch. LCOS unites the best of LCD and DLP technologies into a single machine, displaying both movie and data presentations with seamless, breathtaking clarity.

LCOS REFLECTIVE LCD PANELS

TRANSMISSIVE LCD PANELS

## ❖ AISYS Optical System Technology

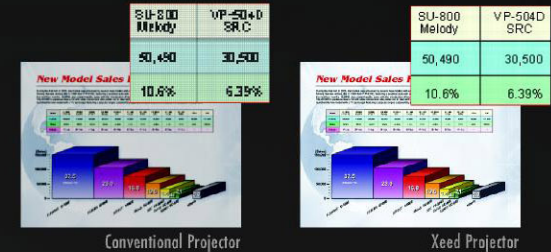

To overcome the cumbersome size and high cost of traditional LCOS projectors, Canon developed AISYS (Aspectual Illumination System), a unique optical illumination system incorporating LCOS technology into a remarkable compact body. AISYS achieves a lightweight and compact chassis without compromising on brightness and contrast.

## ❖ Clearer Text & Graphs

Native SXGA+ resolution displays at 1400 x 1050 pixels, allowing text and figures to be shown with absolute clarity. The synergy of LCOS and AISYS allows details such as fine lines and text to be displayed with unsurpassed sharpness.

Comparison of Text Projection

## ❖ Smoother Photos & Movies

The XEED projectors display photos and movies with breathtaking smoothness and definition - perfect for rich home theatre experience or projecting of corporate videos.

Comparison of Tones and Details

## ❖ Accurate Colour Reproduction

From professional photographers to architects, an impressive presentation depends on accurate, high-quality colour reproduction to ensure projected images look precisely as the creators intended. The XEED projectors support a wide spectrum of colours including sRGB and even Adobe RGB\* for superb reproduction of rich, natural colours.

Comparison of Colour Accuracy

\*For XEED SX6 only

# FEATURES XEED PROJECTOR RANGE

## Adobe RGB and sRGB Colour Space

All XEED projectors feature sRGB mode, ensuring faithful reproduction of images through colour consistency with other sRGB compliant systems.

The XEED SX60 has special colour filters to achieve an expanded colour space in Home Cinema mode for vibrant, high-impact cinematic experience.

The XEED SX6 supports Adobe RGB, to give designers and photographic professionals confidence that their colours will be projected accurately across a wider colour space.

## AUTO SET-UP\*

Auto Set-up function performs 4 vital set-up configurations automatically, at the touch of a button, in as little as 4 seconds. This convenient function is especially useful for inexperienced user to effortlessly create an ideal viewing configuration.

### ① Auto Focus ➡➡ ② Auto Input ➡➡ ③ Auto Keystone ➡➡ ④ Auto Colour Screen

**① Auto Focus**  
 Infrared sensor measures distance to the screen, accurately adjusting the focus as quickly as 1 sec. Focus can also be manually adjusted.

**② Auto Input**  
 Automatically detects and displays signal from input terminals.

**③ Auto Keystone**  
 Automatically corrects image distortion caused by projecting from an angle up to +/-20°. Keystone correction can also be manually adjusted.

**④ Auto Colour Screen**  
 Automatically adjusts colour balance to compensate for varying screen colour. Compensation can also be manually adjusted.

\*Not available on SX50

### XEED SX6

MULTIMEDIA PROJECTOR

- ❖ SXGA+ Resolution (1400x1050)
- ❖ Ultra-bright 3500 Lumens
- ❖ 1.7x Wide-Angle Zoom Lens
- ❖ 1000:1 Contrast Ratio
- ❖ Support Adobe RGB and sRGB Colour Space

### XEED SX60

MULTIMEDIA PROJECTOR

- ❖ SXGA+ Resolution (1400x1050)
- ❖ Super-bright 2500 Lumens
- ❖ 1.7x Wide-Angle Zoom Lens
- ❖ 2000:1 Contrast Ratio (in Home Cinema Mode)
- ❖ Support sRGB Colour Space

### XEED SX50

MULTIMEDIA PROJECTOR

- ❖ SXGA+ Resolution (1400x1050)
- ❖ Super-bright 2500 Lumens
- ❖ 1.7x Wide-Angle Zoom Lens
- ❖ 1000:1 Contrast Ratio
- ❖ Support sRGB Colour Space

### XEED X600

MULTIMEDIA PROJECTOR

- ❖ World's First XGA LCOS Projector (1024x768)
- ❖ Ultra-bright 3500 Lumens
- ❖ 1.7x Wide-Angle Zoom Lens
- ❖ 1000:1 Contrast Ratio
- ❖ Support sRGB Colour Space

# LV SERIES LCD PROJECTOR

## Canon LV Projectors – Presenting the Best of LCD Technology

Canon LCD projectors employ three LCD panels for projecting the primary colours – red, green and blue – simultaneously for a visually more satisfying feast of natural-colour images. View the Canon difference for yourself – genuine Canon lenses in the optical engine provides the performance edge other projectors simply cannot

match. You will be drawn to the brighter images of a Canon LCD multimedia projector with its remarkably smoother colour gradations and shade. Even the smallest details are clearly defined with images that are visibly more natural and lifelike, besides being gentler on the eyes.

### ❖ Advanced Features for the Discerning

Apart from delivering crisp, clear images in native XGA resolution, the new LV projectors have 1.6x zoom lens for projecting huge 80-inch images from as close as two metres. Auto Keystone Correction and Screen Colour setting quickly ready the projector for optimal results. The control panel is also improved to simplify operation and enhances greater ease-of-use.

### ❖ Multiple Projection Modes

The LV projectors allow setting of projection mode to ensure images are best optimized according to content type. Choose from five automatic image modes - Presentation, Video, Cinema, Standard and sRGB. The LV-7255 offers an additional User (custom) mode for fine gamma adjustment useful for correcting images that are too dark or too bright.

### ❖ Sleek Design

Few can argue that the new LV projectors are so stunningly designed they not only look good but are also conveniently compact, light-weighted and portable. This means presenter on the move can be totally reliant on the LV projectors for delivering superb presentation in great style.

# LV RANGE

## Introducing the LV Projector Range – LV-7565/F, LV-7255, LV-7250 & LV-X6

### LV-7565/F

- XGA resolution | Ultra-Bright 5100 lumens | 900:1 contrast ratio
- 1.3x powered wide-angle zoom lens
- Four optional lenses and optional Network Imager

### LV-7255

- XGA resolution | Bright 2500 lumens | 600:1 contrast ratio
- 1.6x wide-angle zoom lens | Near-silent 30dBA in Quiet mode

### LV-7250

- XGA resolution | Bright 2000 lumens | 600:1 contrast ratio
- 1.6x wide-angle zoom lens | Near-silent 29dBA in Quiet mode

### LV-X6

- XGA resolution | Controlled 1500 lumens | 500:1 contrast ratio
- 1.6x wide-angle zoom lens | Near-silent 25dBA in Quiet mode

## KIT CONTENT

### LV-7565/F

- Owner's Manual
- AC Power Cord
- Wireless/Wired Remote
- Control Unit (with laser pointer function)
- Batteries
- Wired Remote Cable
- VGA Cable
- USB Cable
- 1 Control Cable (for Serial)
- Protective Dust Cover
- Lens Cover (LV-7565)
- Lens Attachment (LV-7565F)

### LV-7255 / LV-7250 / LV-X6

- Quick Guide
- Owner's Manual CD-ROM
- AC Power Cord
- Remote Control Unit & Batteries
- VGA Cable
- Lens Cover with String
- Soft Carrying Case
- Remote Mouse Receiver (except LV-X6)
- Carrying Handle with Screws and Flathead Screwdriver

## OPTIONAL LENSES & ACCESSORY (For LV-7565/F)

**Ultra Wide Angle Lens (LV-IL01)**  
 Lens: f=22.33mm, F2.5  
 Projected Image: 70" to 120"  
 Throw Distance: 1.13 to 1.96 m

**Wide Angle Zoom Lens (LV-IL02)**  
 Lens: f=34.33 - 48.02mm, F2.5 - 3.06  
 Projected Image: 40" to 300"  
 Throw Distance: 0.98 to 7.74 m

**Long Focus Zoom Lens (LV-IL03)**  
 Lens: f=63.5 - 111.5mm, F2.03 - 2.89  
 Projected Image: 60" to 300"  
 Throw Distance: 2.73 to 14.23 m

**Ultra Long Focus Lens (LV-IL04)**  
 Lens: f=111.6 - 155.2mm, F2.06 - 2.73  
 Zoom: 1.4x  
 Projected Image: 40" to 300"  
 Throw Distance: 3.48 to 25.0 m

The Network Imager connects LV-7565/F to your computer network for remote management of the projector via graphical user interface.

# AWARDS & TESTIMONIALS

## A Testament to Our Success

Canon's first XEED projector SX50 won the prestigious TIPA award in 2005, bagging the title of "Best Photo Projector in Europe, 2005". It also won the celebrated title of "Projector of the Year" in Japan. HardwareMAG (HWM) presented XEED SX50 with the Platinum Award and gave it a perfect score of 10 out of 10 for excellence. HardwareZone.com, the leading tech site in Southeast Asia describes the XEED SX50 as:

"The Canon XEED SX50 was awarded the "Best of 2005" Award because of its excellent image quality and it gives the best mix of contrast & color. It is better than the 3-panel LCD projector and much more affordable than a 3-panel DLP projector. All in all, its price positioning made it a clear winner which no other projectors can offer in terms of image quality, within that price range."

The XEED SX50 has also found its way to the hearts of many professional photographers and photo studios, winning accolades for its outstanding capability in accurate colour reproduction and fine representation of details in the world of photography. The XEED SX50 has also found its way to government agencies, schools, medical research institutions, technological research facilities, design and architecture firms all over the world.

*"Stylish design and superb colour separation, real life projection"*

*- Ms Zafina, Business Today*

*"Never seen such a seamless image of projection before"*

*- Mr Rizahar B Ramli, Cosmoelite Sdn Bhd*

*"This is the moment that we are waiting for, the best of LCD and DLP technologies, giving the best detailed projection ever since"*

*- Dr. Philip Ng, Hot Entertainment*

Canon

# VISUALIZER RE-455X

## Visualizer RE-455X

The Canon RE-455X visualizer incorporates Canon's sophisticated lens technology, beautifully displaying documents, 3-D objects and moving pictures for presentations that will captivate and dazzle audiences. The RE-455X can be connected directly to a Canon projector or a TV via XGA, Video, or S-Video terminals.

- The RE-455X has XGA (1,024 x 768 pixels) resolution for displaying highly-detailed images. Equipped with a high magnification 12x power zoom lens ensures full-screen projection of minute objects and fine document.
- The new One-shot AF mode effortlessly achieves focus at the touch of a button, further adding convenience to frequent changing of subjects during the presentation.
- Connect your PC to the RE-455X, then switch between the RGB input from your computer and the image from the RE-455X for a single, seamless presentation.

EASY-TO-USE ONE-TOUCH BUTTON

OPTION 1  
Show documents  
or photos.

OPTION 2  
Project 3-D objects.

RESULT  
Sharp, detailed images  
that dazzle audiences.
